OFFICE OF THE DEWAN OF MYSORE.

N O T E.

Dated .. 29th January 1927.

During my visit to Chamarajanagar on 19th January 1927, the necessity of carrying out the following road and bridge works was urged by the people:-

		Estimated cost.
1. Nanjangud-Hasnur Ghat road...	Rs.	9,000
2. Bridge across Suvarnathi (Dt. Board) ..	"	12,700
3. Alahalli Road (Dt. Board 2,500) ..	"	8,000
4. Chamarajanagar-Hondrabal (Dt. Board) ..	"	1,000

The Deputy Commissioner said that the District Board was prepared to meet its quota of the cost. The question of sanctioning these works may kindly be considered at once, in consultation with Deputy Commissioner.

Letter No.199/L.B.26-27 dated 23rd/30th December 1926, from the President, District Board, Mysore, to the Executive Engineer, Mysore Division, Mysore.

With reference to your letter No.764 dated the 10th December 1926 forwarding, for countersignature, an estimate for Rs12,700/- for constructing a bridge across Suvarnavathi river - near Chendakavadi, I have the honour to state that the execution of the above was approved by the District Board at their meeting held on the 11th December 1926 (Resolution No.24). The cost during 1926-27 is proposed to be met from the Taluk Board grant of Rs5,000/- and the balance of the cost will be provided for -- by the District Board in their budget for 1927-28.

In returning herewith the above estimate duly countersigned, I request that necessary action may be kindly taken for getting very early sanction to the estimate and starting the -- work out of the allotment of Rs5,000/- which will be paid on --- monthly bills as usual.

The enclosures received with your letter under reply are herewith returned.

R E P O R T.

Reference:- Letter No.C.714/L.B.28/29-10-26, from the President, District Board, Mysore, to the Executive Engineer, Mysore Division, Mysore.

The river Suvarnavathi crosses the Punjur Bedaguli Hondrabal Chamarajanagar Road in 3/6 of the road. On the eastern side of the river there are big villages of the Taluk, Viz: Nagavalli, Honganur, Kagalavadi and also most of the Yelandur Jahagir and the State Forest of Hondrabal and Kyatedevaragudi. During flood season, the river becomes impassable and thus the traffic is handi-capped and lot of inconvenience is caused to the general public as crossing is not possible for several days sometimes. Hence it is proposed to construct a bridge near the Village of Chandakavadi.

It is learnt that during the recent gauging across the river near Byadamudlu that the maximum discharge in the river was only about 3000 cusics and that the average velocity was from 5 to 6 feet per second. Hence now, for the design of the bridge a water way of about 3000/5 = 600 S.ft has been allowed.

Also cross sections of the river were taken in thes places, one up stream side of the bridge site at a distanc of 1¾ mile, the second, just near the bridge site and the third about ¾ mile lower down the river and on these cross sections, H.F.L. was marked and the maximum way was found to be only 480 Sq.ft, 400 Sq.ft, and 600 Sq.ft., Hence 600 Sq.ft the area arrived at as the water way required is likely to be sufficient for passage of flood waters safe

From the above two, it is seen that 600 Sq.ft of water way is enough and to be on the safe side, for the present design a water way of 840 Sq.ft is allowed, providing 20 vents of 6 x 7.
